

YagiCAD 6.3.x Element Library V1.1

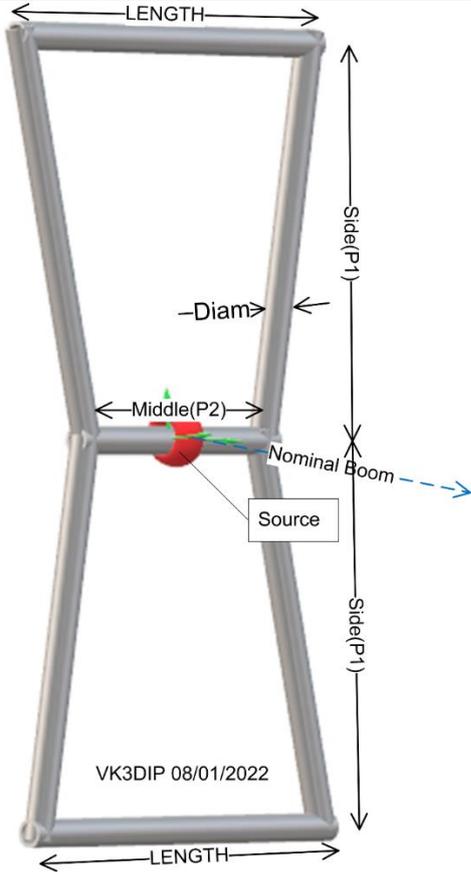

VK3DIP January 2022

Element Number	Element Name	Diagram	Description
0	Dipole		<p>The default type, simple dipole element. Default Length = 0.48λ</p>
1	SQuad		<p>A square quad shape centred on the nominal boom. Driven point mid lower section. Default Length = 0.27λ</p>
2	Folded		<p>A simple square folded dipole distributed around nominal boom, Voltage source in lower wire. Default Length = 0.42λ, Default VSpace = 0.075λ</p>
3	2Dipole		<p>Two identical dipoles one above the other distributed above and below nominal boom. A Passive element only. Default Length = 0.48λ, VSpace = 0.3λ</p>

4	FoldedFlat F		<p>Square Folded Dipole laid flat (Horizontal). Driven wire at nominal spacing, other wire towards front of antenna. Nominal Boom through both elements. Default Length = 0.42λ, HSpace = 0.075λ</p>
5	FoldedFlat B		<p>Square Folded Dipole laid flat (Horizontal). Driven wire at nominal spacing, other wire towards back of antenna. Nominal Boom through both elements. Default Length = 0.42λ, HSpace = 0.075λ</p>
6	3Dipole		<p>Three identical dipoles above each other distributed above and below nominal boom. A Passive element only. Default Length = 0.48λ, VSpace = 0.25λ</p>
7	4Dipole		<p>Four identical dipoles above each other distributed above and below nominal boom. A Passive element only. Default Length = 0.48λ, VSpace = 0.2λ</p>

8	BentDipF	<p style="text-align: center;">VK3DIP 08/01/2022</p>	<p>Dipole with forward bend. In plain of nominal boom. Driven wire at nominal spacing, other wires bent towards front of antenna. Default Length = 0.38λ, Bend = 0.1λ, Inner = 0.25λ</p>
9	BentDipB	<p style="text-align: center;">VK3DIP 08/01/2022</p>	<p>Dipole with backwards bend. In plain of nominal boom. Driven wire at nominal spacing, other wires bent towards back of antenna. Default Length = 0.38λ, Bend = 0.1λ, Inner = 0.25λ</p>
10	BentDipU	<p style="text-align: center;">VK3DIP 08/01/2022</p>	<p>Dipole with Upwards bend. Driven wire at nominal spacing, other wires bent up from antenna. Default Length = 0.38λ, Bend = 0.1λ, Inner = 0.25λ</p>
11	BentDipD	<p style="text-align: center;">VK3DIP 08/01/2022</p>	<p>Dipole with Downwards bend. Driven wire at nominal spacing, other wires bent down from antenna. Default Length = 0.38λ, BendD = 0.1λ, Inner = 0.25λ</p>

12	BentX	<p>VK3DIP 08/01/2022</p>	<p>X Shaped Dipole with bent arms. Driven wire at nominal spacing, other wires up and down from antenna. Default Length = 0.8λ, Bend = 0.6λ, Inner = 0.2λ, Driven wire is fixed at 0.0125λ.</p>
13	RndFolded	<p>VK3DIP 08/01/2022</p>	<p>Approx. rounded end folded dipole distributed around nominal boom, Voltage source in lower wire. Default Length = 0.42λ, Default VSpace = 0.058λ, Rad(R) of end circles = $P1/2$ End segs each $0.765 * R$</p>
14	RndLoop	<p>VK3DIP 08/01/2022</p>	<p>Approx. rounded (Octagonal) loop on nominal boom, Voltage source in lower wire. Default Length = 0.32λ, each octet side is $0.765 * \text{Radius}$</p>

15	VarBowTie	 <p style="text-align: center;">VK3DIP 08/01/2022</p>	<p>RSGB Style Skeleton Slot LENGTH=0.19λ Middle(P2)=0.19λ Side(P1) = 0.29λ</p> <p>Dual Square Quad LENGTH=0.25λ Middle(P2)=0.25λ Side(P1)= 0.25λ</p> <p>VK3DIP Semi-BowTie LENGTH = 0.265λ Middle(P2)= 0.19λ Side(P1)= 0.3125λ</p> <p>Defaults to VK3DIP Semi-BowTie</p>
